

V611

- A new hydraulic crimp tool with larger crimp range

V611 represents a development of Elpress existing range of manual 6 ton crimp tools.

The most important features are:

- Two-step fast feed piston movement to crimp engagement makes the crimp cycles shorter
- The crimp range is increased to 150 mm² (KRF), 185 mm² (KRD), 240 mm² (KRT) and 50+50 mm² C-sleeves
- Same crimp dies as in the Elpress System PV600 (i.e. all dies type TB and KB)

Weight 2,5 kg

Dimensions 425 x 115 x 53 mm

Crimp force 60 kN (6 ton)
